Introduction

A great mastery of essential English words will no doubt be very helpful to you in achieving a satisfactory GMAT score and improving communication skills. To better assist you in your GMAT preparation, Manhattan Review has developed an exclusive Vocabulary List for your reference.

This book includes about 2,500 words and phrases which have appeared in the past GMATs. We have categorized all of them by their grammatical forms such as transitive verb, intransitive verb, countable noun, uncountable noun, adjective and phrase.

In addition to the first two columns of *Words* and *Forms*, we have also included another 4 columns to the right: *Grammatical Details*, *Key Definitions*, *Example Sentences* and *Relevant Words*.

Grammatical Details cover all the different verb variations in the past tense, past participle, present participle, and third-person present singular forms.

Key Definitions show all the common and most important meanings of a word in a plain and succinct manner.

Example Sentences demonstrate the actual applications of a word in a simple context. We believe it is easier for students to memorize and use new vocabularies once they see sample sentences involving the new words.

Relevant Words include all the related adjectives, nouns, adverbs and other forms of a word. They are shown to broaden students' knowledge of a word and their ability to better maneuver the language in different contexts.

Please note that a portion of this list may have been distributed to you in advance of your GMAT course for the purpose of warming up your English grammar skills and refreshing your command of English vocabulary.

To keep all our course materials at a consistently high level of quality, Manhattan Review will continue to update and broaden this list. If you have any comments, please let us know in your Course Evaluation form.
