## Jain College, Jayanagar <br> II PUC Mock Paper - I <br> Sub: STATISTICS

Duration: 3 Hrs 15 mins
Max.Marks: 100
Note: 1. Statistical tables and graph sheets will be supplied.
2. Scientific calculators are allowed.
3. All working steps should be clearly shown.

## PART - A

I. Answer any ten questions:
$1 \times 10=10$

1. Define cohort.
2. Mention the Index number which satisfies both TRT and FRT.
3. Mention any one use of cost living index number.
4. Which index number is used for measurement of seasonal variation?
5. Write down the relationship between mean and variance of binomial distribution.
6. If X is Poisson variate with mean 3 . What is its standard deviation?
7. Define composite hypothesis.
8. In a $\left(\chi^{2}\right)$ chi-square test for goodness of fit if there are 8 classes and if 1 parameter is estimated what is the degree of freedom of the test statistic?
9. Define test statistic.
10. What is a defect?
11. Define no solution in L.P.P.
12. What is pure strategy in a game?

## PART - B

II. Answer any 10 questions:
13. In a life table, if $l_{1}=95,400$ and $l_{2}=93,492$ then, find survival ratio and mortality ratio of the first year.
14. Calculate the consumer price index number using the following data

| Items | Group <br> Indices | Group <br> weights |
| :--- | :--- | :--- |
| A | 102 | 8 |
| B | 97 | 6 |
| C | 108 | 12 |
| D | 110 | 4 |

15. State circular test in Index number.
16. Given the parabolic equation $y=a+b x+c x^{2}$, write down the normal equations.
17. Write the formulae of finding ' $x$ ' and ' $y x$ ' of Newton's method of interpolation.
18. Under what conditions, does Binomial distribution tends to Poison distribution?
19. The first probability term is equal to the second probability terms of a Poison distribution. Then find the mean.
20. Find the area under the normal curve between $\mathrm{Z}=-1.5$ and $\mathrm{Z}=+1.5$
21. A sample of 100 children was chosen from a population. If weight of these children is 20 kgs and variance is 16 kgs . Find the standard error of mean weight of selected children.
22. Mention the types of causes of variation in a manufacturing process.
23. Mention two method of obtaining initial basic fesible solution for a transportation problem.
24. Give two disadvantages of the inventory.

## PART - C

## III. Answer any 8 questions:

25. From the following data calculate GFR

| Age (in yrs) | Female Population | No. of live births |
| :--- | :--- | :--- |
| $15-19$ | 5000 | 100 |
| $20-24$ | 6000 | 700 |
| $25-29$ | 4500 | 800 |
| $30-35$ | 2500 | 100 |
| $35-39$ | 2500 | 100 |
| $40-44$ | 2000 | 50 |
| $45-49$ | 1000 | 10 |

26. Explain the steps involved in the construction of cost of living index number.
27. Calculate $\mathrm{P}_{01}$ by simple averages of price relatives using (i) Arithmetic mean (ii) Geometric mean

| Items | A | B | C | D | E |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Price in 2012 | 26 | 32 | 18 | 12 | 40 |
| Price in 2014 | 28 | 30 | 20 | 12 | 45 |

28. Complete 5 yearly moving averages for the following time series and indicate trend.

| Year | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Value | 27 | 28 | 30 | 32 | 29 | 31 | 34 | 36 | 35 |

29. For the following table determine the missing values.

| X | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Y | 185 | 167 | $?$ | 146 | 121 | 80 | $?$ |

30. Assuming that birth to male and female to be equally likely. Find the probability that a equally likely. Find the probability that a family with 4 children will have (i) three or more daughter (ii) no daughter
31. A pond has 20 fishes of which 8 are red and remaining are white. Four fishes are caught. Find the mean and variance of the number of red fishes caught.
32. From the following data, test whether, there is any significant difference between mean mark of students in two subjects.

| Subjects | Mean marks | Variance | Sample Size |
| :--- | :--- | :--- | :--- |
| Statistics | 84 | 10 | 12 |
| Accountancy | 80 | 8 | 10 |

33. The standard deviation of weights of 15 new born babies 0.36 kgs . Test at $5 \%$ level of significance that the standard deviation of weights of new born babies is less than 0.4 kg .
34. Partition panels are manufactured by a firm. A crack or unthickness or a bubble or improper spread of design of paint is considered as defect. Following panels is considered as defect. Following panels containing defects are noted as below:

| Sample <br> panel | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of <br> defects | 2 | 1 | 0 | 4 | 3 | 2 | 1 | 0 | 4 | 0 |

Draw control chart for the above data and analyse the data.
35. Graphically solve the following L.P.P

Max $Z=20 x+80 y$
S.t $2 x+6 y \leq 60$

$$
x+4 y \leq 32
$$

\& $\quad x, y \geq 0$
36. The cost of a machine is Rs 6600 and its resale value is Rs 600 . The maintenance costs in different years are as follows.

| Year | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Maintenance <br> cost (Rs) | 250 | 300 | 450 | 600 | 900 | 1500 | 1800 |

Determine the age at which the machine should be replaced.

## PART - D

IV. Answer any 2 questions:
$10 \times 2=20$
37. From the following data, calculate the STDR's for locality A and locality B. Taking locality A as standard population \& comment.

| Age (in <br> years) | Locality A |  | Locality B |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Population | Deaths | Population | Deaths |
| Below 10 | 4000 | 60 | 8000 | 80 |
| $10-35$ | 9000 | 45 | 13000 | 65 |
| $35-65$ | 7000 | 70 | 10000 | 90 |
| $65 \&$ above | 3000 | 120 | 4000 | 200 |

38. Construct Fisher's Price Index number for the following data. Test whether it satisfies Time Reversal Test \& Factor Reversal Test.

| Commodity | Base year |  | Current year |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Price(Rs) | Quantity | Price(Rs) | Quantity |
| A | 7 | 70 | 9 | 100 |
| B | 9 | 80 | 11 | 110 |
| C | 15 | 25 | 20 | 40 |
| D | 20 | 30 | 25 | 40 |

39. Fit a straight line trend for the following data and hence find trend values. Also estimate the price for the year 2013.

| Year | 2007 | 2008 | 2009 | 2010 | 2011 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Price (Rs) | 12 | 20 | 31 | 40 | 47 |

40. Fit a Poisson distribution to the following data:

| No. of <br> cars sold | 0 | 1 | 2 | 3 | 4 | 5 | $6 \& m o r e$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of <br> days | 18 | 43 | 45 | 28 | 12 | 3 | 1 |

Test whether the Poisson distribution is a good fit.

## PART - E

V. Answer any 2 questions:
41. The weekly wages of workers are normally distributed with mean Rs 3,000 \& S.D Rs 500 . Find the probability of workers whose weekly wages will be i) more than Rs 3,400 ii) Between Rs 2,500 \& Rs 3,500.
42. 28 students passed among 45 randomly selected students a college. 32 students passed among 55 randomly selected students of another college. Test whether passing proportions is same in both the colleges (use $\alpha=5 \%$ ).
43. Find the solution of the game by the principle of dominance for the following pay-off matrix of A.

Player B
$\begin{array}{llll}B_{1} & B_{2} & B_{3} & B_{4}\end{array}$
Player A $\begin{gathered} \\ \\ A_{1}\end{gathered} A_{2}\left[\begin{array}{cccc}-7 & 0 & 3 & -5 \\ 7 & -2 & 0 & -4 \\ & A_{3} \\ & A_{4}\end{array}\left[\begin{array}{cccc} \\ -2 & -1 & -2 & 0 \\ 4 & 2 & 3 & 6\end{array}\right]\right.$
44. There is a demand for 5,000 items per year. The replenishment cost Rs 100 and the maintenance cost Rs 10 per iterm per year. Replenishment is instantaneous and shortages are not allowed find:
i) optimal lot size
ii) optimum time between orders
iii) optimum number of orders
iv) minimum annual average inventory cost.
