## JAIN COLLEGE

463/465, 18th Main Road, SS Royal, 80 Feet Road, Rajarajeshwari Nagar, Bangalore - 560098

Date:
SUBJECT: STATISTICS

## II PUC Mock paper I

Timings Allowed: 3 Hrs15Minutes.
Total Marks: 100
INSTRUCTIONS: 1. Graph sheets and statistical tables will be provided on request.
2. Scientific calculators may be used.
3. All working steps should be clearly shown.

## SECTION-A

I. Answer any ten of the following:
$1 \times 10=10$

1. Define vital statistics.
2. Which index number is used in fixation of salary to government employees
3. Which reversibility test satisfied by Marshall-Edgeworth's index number
4. Mention the component of time series associated with decrease in petroleum price
5. Write the range of Hypergeometric distribution
6. If the S.D of a poisson distribution is 2 , then find its variance
7. What is alternative hypothesis?
8. Define critical value
9. Define confidence co-efficient
10. Which type of 'variation of causes' is detected by S.Q.C.
11. When do you say that the T.P is balanced
12. What is pure strategy of a game?

## SECTION-B

II. Answer any Ten of the following:
13. Explain briefly the registration method of collection of vital statistics
14. State any two limitations of Index Numbers
15. Why Fisher's Index number is called ideal?
16. Write down the normal equation for fitting linear trend
17. Write down the condition for application of Binomial expansion method of Interpolation.
18. Write down the Bernoulli distribution with parameter $\mathrm{P}=0.23$
19. In a poisson distribution, the first two frequencies are 100 and 120 Respectively. Find the next frequency term.
20. Define sample space and parameter space.
21. The proportion of vegetarians in village $A$ is 0.42 .The proportion of vegetarians in village $B$ is 0.37 .Among 70 randomly selected people from village A . if $\mathrm{P}_{1}$ is the proportion of vegetarians and among 60 randomly selected people from village $B$ if $P_{2}$ is the preparation of vegetarians. Find the standard error of $\left(\mathrm{P}_{1}-\mathrm{P}_{2}\right)$.
22. Mention two disadvantages of acceptance sampling plan
23. Mention the two areas of economic, industrial areas where operations research can be

Applied.
24. In a linear programming problem define a feasible solution

## SECTION-C

III. Answer any eight of the following: $8 \times 5=40$

25 . Find the total fertility for the following data

| Age <br> group(yrs) | $15-19$ | $20-24$ | $25-29$ | $30-34$ | $35-39$ | $40-44$ | $45-49$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No.of live <br> births | 840 | 1350 | 2800 | 1200 | 1040 | 500 | 120 |
| Women <br> popl | 14000 | 15000 | 14000 | 13000 | 12000 | 11000 | 10000 |

26. From the following data compute weighted geometric mean price index number

| Item | A | B | C | D | E |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 2008 price | 80 | 120 | 100 | 120 | 80 |
| 2012 price | 120 | 150 | 80 | 90 | 100 |
| Weights | 3 | 2 | 2 | 1 | 2 |

27. Compute the consumer price index number by aggregative expenditure method

| Items | Price (Rs) |  | Expenditure |
| :--- | :--- | :--- | :--- |
|  | $2005(100)$ | 2010 |  |
| Rice | 16 | 22 | 320 |
| Wheat | 12 | 18 | 96 |
| Pulse | 20 | 35 | 40 |
| Sugar | 17 | 20 | 85 |
| Oil | 50 | 55 | 150 |
| Salt | 10 | 8 | 30 |
| Clothing | 40 | 20 | 160 |
| Fuel | 200 | 380 | 200 |
| Housing <br> Rent | 1500 | 2500 | 3000 |
| Others | 2200 | 3000 | 17000 |

28. Find 3 yearly moving averages for the following time series and show the trend Line on a graph

| Year | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 |
| :---: | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Sales(units) | 30 | 36 | 39 | 33 | 39 | 45 | 42 |

29. From the following frequency distribution find the number of students whose marks is less than 45

| Marks | $30-40$ | $40-50$ | $50-60$ | $60-70$ | $70-80$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| No.of <br> students | 31 | 42 | 51 | 35 | 31 |

30. Assuming that birth to male and female to be equally likely. Find the probability that a family with 4 children will have 1)Three or more daughters ii) No daughters.
31. A pond has 20 fishes of which 8 are red and remaining are white. Four fish are caught. Find the mean and variance of the number of fishes caught.
32. A certain brand soap is known to have weights with variance 25.A random sample of 256 soaps had mean weight 122 gms .Can we conclude that the mean weight of the soaps manufacture by the firm is 125 gms ?
33. Following is the data regarding the family conditions and examination results of 100 students .Test whether result depends on family condition

| Family <br> conditions | Examination Result |  |  |
| :--- | :---: | :--- | :--- |
|  | Pass | Fail | Total |
| Bad | 20 | 10 | 40 |
| Total | 50 | 40 | 60 |

34. For the following data, find the control limits for - chart (Given $\mathrm{A}_{2}=0.577$ )

| Subgroup <br> No. | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Mean | 52 | 48 | 53 | 49 | 50 | 48 |
| Range | 10 | 11 | 8 | 12 | 9 |  |

35. From the following pay-off matrix of player A, solve the game by maximin-minimax principle

|  |  | Player B |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | $\mathrm{B}_{1}$ | $\mathrm{~B}_{2}$ | $\mathrm{~B}_{3}$ | $\mathrm{~B}_{4}$ |
| Player | $\mathrm{A}_{1}$ | 3 | 2 | 1 | 6 |
|  | $\mathrm{~A}_{2}$ | 3 | 1 | 0 | 4 |
|  | $\mathrm{~A}_{3}$ | 3 | 4 | -3 | 0 |

36. Solve the following linear programming problem by graphical method

Max $\mathrm{Z}=20 \mathrm{x}+50 \mathrm{y}$
Subject to constraints: $6 x+3 y \leq 180$

$$
4 x+8 y \geq 160 \text { and } x, y \geq 0
$$

## SECTION-D

IV.Answer any two the following questions
$2 \times 10=20$
37. The following gives the age and sex distribution and the live births occurring in a population. Compute CBR and GRR and ASFR.

| Age | Men population | Women <br> population | No. of live births |
| :--- | :--- | :--- | :--- |
| $0-14$ | 10730 | 9840 | 0 |
| $15-19$ | 8400 | 7900 | 212 |
| $20-24$ | 9980 | 9910 | 657 |
| $25-29$ | 7400 | 7360 | 7120 |
| $30-39$ | 7300 | 6910 | 592 |
| $40-49$ | 6000 | 5860 | 0 |
| 50 and above |  | 37 |  |

38. Show that Marshall-Edgeworth's index number satisfies TRT and fishers satisfies TRT and FRT.

|  | Base year |  | Current year |  |
| :--- | :--- | :--- | :--- | :--- |
| Articles | Price | Quantity | Price | Quantity |
| A | 10 | 6 | 15 | 5 |
| B | 12 | 10 | 15 | 10 |
| C | 18 | 5 | 27 | 3 |
| D | 8 | 5 | 12 | 4 |

39. Below are given the figures of production (in 000 's $Q+1 s$ ) of a sugar factory.

| Years | 2000 | 2002 | 2004 | 2006 | 2008 | 2010 | 2012 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Production <br> (in <br> millions) | 80 | 90 | 92 | 83 | 94 | 99 | 92 |

i) Fit a straight line trend to this figures.
ii) Compute the trend values.
iii) Estimate the production for the year 2004.
40. Fit Poisson distribution to the following data.

| No.of cars <br> sold | 0 | 1 | 2 | 3 | 4 | 5 | 6 and <br> more |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| No. of days | 18 | 43 | 45 | 28 | 12 | 3 | 1 |

Test whether the poisson distribution is good fit.

## SECTION -E

## V.Answer any two of the following questions:

$2 \times 5=10$
41. X is normal variate with mean 64 and variance 144 determine (i) $\mathrm{P}(\mathrm{X}>67)$ (ii) $\mathrm{P}(60<\mathrm{X}<66)$.
42. In a random sample of 1000 persons, from town A 400 are found to be non-Vegetarians. In a sample of 200 from town B 400 are Non-Vegetarians do this data revile that there is a significant difference in the proportion of Non-vegetarians in the two towns.
43. The tensile strength of 8 rods were $8.3,12,14,7,13,9$, and 6 tons. Test the hypothesise the variance of tensile strength is more that 4 tons.
44. There is demand for 5000 items per year. The replenishment cost Rs. 100 and the maintenance cost Rs. 10 per item per year. Replenishment is instantaneous and shortages are not allowed find. i) Optimal lot size ii) optimal number of orders iii) minimum annual average inventory cost.
