## JAIN COLLEGE

463/465, 18th Main Road, SS Royal, 80 Feet Road, Rajarajeshwari Nagar, Bangalore - 560098

Date:
SUBJECT: STATISTICS

## II PUC

MOCK PAPER I
Timings Allowed: 3Hrs 15 Minutes.
Total Marks: 100

## Instructions:

1.Graph sheets and statistical tables will be provided on request.
2.Scientific calculators may be used
3.All working steps should be clearly shown

## SECTION-A

I.Answer all the following questions. $10 \times 1=10$

1. Define cohort.
2. What is the value of index number for the base year?
3. Mention any one factor causing seasonal variation.
4. What is time series?
5. Give the condition under which Poisson distribution tends to Normal distribution.
6. In a Binomial distribution if $\mathrm{n}=7$ and $\mathrm{p}=0.7$ find standard deviation.
7. Define critical region.
8. what is interval estimation?
9. What is meant by multiple solution in LPP?
10. When is a transportation problem balanced?
11. What is meant by defects?
12. Which type of variation can be detected with the help of statistical quality control?

## SECTION-B

II.Answer all the following questions.
$10 \times 2=10$
13. Mention the methods of collecting vital statistics.
14. The female population of child bearing age group in a region is $1,85,000$. The number of live births in the year in the region is 3400.Find GFR.
15. Write any two limitations of Index Number.
16. Diagrammatically represent 'Business cycle' with stages.
17. State any two differences between Moving Average and Least squares methods of obtaining trend values.
18. Define Interpolation and Extrapolation.
19. Define Point estimation and interval estimation.
20. The First and Second Quartile of a Normal Distribution are 38 and 50 respectively. Find upper quartile.
21. What do you mean by Process control and Product control?
22. Mention any two advantages of 'Acceptance Sampling Plan'.
23. Given $\mathrm{R}=1800$ /year, $\mathrm{C}_{3}=300, \mathrm{C}_{1}=2 /$ Unit/year, find the optimum lot size of an inventory.
24. The objective function and two solutions of an LPP are $M a x Z=5 X+4 Y$ and $A(12,10) ; B(14,4)$. Find the optimal solution.

## SECTION-C

III.Answer all the following questions.
$8 \times 5=40$
25. Compute TFR from the following data

| Age(in years) | $15-19$ | $20-24$ | $25-29$ | $30-34$ | $35-39$ | $40-44$ | $45-49$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Female Population | 48000 | 50500 | 46000 | 44000 | 40000 | 40000 | 30000 |
| No. of births | 1250 | 7430 | 7900 | 5500 | 1390 | 500 | 50 |

26 .What is Consumer Price Index Number(CPI). Write its Four uses.
27. Compute Kelly's price index number for the following data.

| Group | Price(in Rupees) |  | Quantity |
| :--- | :--- | :--- | :--- |
|  | Base year | Current <br> year |  |
| A | 120 | 150 | 75 |
| B | 60 | 80 | 30 |
| C | 90 | 110 | 20 |
| D | 36 | 65 | 25 |
| E | 40 | 70 | 10 |
| F | 52 | 65 | 22 |

28. Find trend values of the following time series by three yearly moving average method.

| Year | 2001 | 2002 | 2003 | 2004 | 2005 | 2006 | 2007 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Values | 2.65 | 3.5 | 3.75 | 4.2 | 4.8 | 5.1 | 5 |

29. The number of accidents in a year attributed to taxi drivers in a city follows Poisson Distribution with mean 2.5 . Out of 2000 taxi drivers, find approximately the number of drivers with
a) One accident b) More than 2 accidents in a year.
30. In a Hyper Geometric distribution if $a=6, b=9$ and $n=4$ then find
a) $\mathrm{P}(\mathrm{X}=2)$
b)Standard deviation.
31. Following is the data regarding mean weights of randomly selected boys and girls of PUC students .Test whether , mean weight of boys is less than mean weight of girls [Use 5\% L.O.S]

| Sample | Boys | Girls |
| :--- | :--- | :--- |
| Size | 64 | 48 |
| Mean | 50 kg | 54 kg |
| S.D | 8 kg | 12 kg |

32. In an election the leaders of a party contend that they would secure more than $36 \%$ of votes. A pre-poll survey of 400 voters revealed that the percentage is 42 . Does the survey support the leader's claim? [Use 5\%L.O.S].
33. Solve the following LPP graphically

Max $Z=5 x+4 y$
S.t $4 x+y \geq 40$
$2 x+3 y \geq 60$
And $\mathrm{x}, \mathrm{y} \geq 0$
34. Given: $\mathrm{D}_{3}=0, \mathrm{D}_{4}=2.115$ and $\bar{R}=4$, Draw R-chart for the following data:

| Sub-groups | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathrm{R}_{1}$ | 3 | 5 | 5 | 3 | 6 | 2 |

35. The capital cost of a machine is Rs.10,500. Its resale value is Rs.500. The maintenance costs are as follows.

| Age(years) | 1 | 2 | 3 | 4 | 5 | 6 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Maintenance cost(in Rs.) | 800 | 1000 | 1500 | 2200 | 2800 | 3900 |

36.For the following Transportation problem, obtain the initial basic feasible solution by NWCR method .Is the solution degenerate?

|  |  | Warehouse |  |  | Availability |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | I | II | III |  |
| Factory | A | 2 | 17 | 27 | 5 |
|  | B | 3 | 4 | 9 | 8 |
|  | C | 5 | 9 | 7 | 7 |
|  | D | 1 | 6 | 2 | 14 |
|  | Requirements |  |  |  |  |  |

## SECTION-D

IV.Answer all the following questions.
37. For the following two villages compute standardized death rates and comment.

| Age(in <br> years) | Standard <br> population | Village A | Village B |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | 20,000 | 8,000 | Population | Deaths | 128 |
| $20-50$ | 30,000 | 13,000 | 65 | 4,000 | 72 |
| $50-70$ | 35,000 | 10,000 | 140 | 7,000 | 54 |
| 708 above | 15,000 | 4,000 | 252 | 3,000 | 98 |

38. Verify whether Marshall-Edgeworth's index number satisfies Time Reversal Test.

| Items | 2002 | 2006 |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  | Price(Rs.) | Value(Rs.) | Quantity consumed | Value(Rs.) |
| A | 10 | 1500 | 160 | 1760 |
| B | 12 | 1080 | 100 | 1300 |
| C | 15 | 900 | 60 | 960 |
| D | 9 | 450 | 40 | 480 |

39. Fit a parabolic trend to the following time series and estimate the profit for the year 2007.

| Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Profit | 50 | 60 | 55 | 61 | 72 | 73 | 75 |

40.Fit a Poisson distribution to the data and test for goodness of fit

| x | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| f | 364 | 376 | 218 | 89 | 33 | 13 | 2 | 1 |

## SECTION-E

## IV. Answer all the following questions.

## $2 \times 5=10$

41.The mean yield for one acre plot is 662 kilos with standard deviation 32 kilos .Assuming Normal Distribution, how many one acre plots in a batch of 1000 plots would you expect tb have yield i) more than 700 kilos ii) below 650 kilos.
42. Graphically solve the following LPP

Minimize $Z=50 x+30 y$
Subject to $5 x+4 y \geq 40$
$2 x+5 y \geq 10$
And $x \geq 0, y \geq 0$
43. I.Q. of 5 students before and after training are given below:

| Student | 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Before training | 122 | 126 | 105 | 132 | 111 |
| After training | 117 | 118 | 123 | 133 | 105 |

44. There is a demand for 8000 items per year. The ordering cost is Rs. 200 and carrying cost is Rs. 10 per item per year. Then find i)EOQ ii)The minimum average inventory cost
