

SECTION - A

1.	This question consists of TWENTY-FIVE sub-questions $(1.1-1.25)$ of ONE marks each. For each of these sub-questions, four possible alternatives (A, B, C and D) are given, out of which ONLY ONE is correct. Indicate the correct answer by darkening the appropriate bubble against the question number on the left hand side of the Objective Response Sheet (ORS). You may use the answer book
	side of the Objective Response Sheet (ORS). You may use the answer book provided for any rough work, if needed.

	are given, out of which ONLY ONE is corr darkening the appropriate bubble against side of the Objective Response Sheet (Of provided for any rough work, if needed.	ect. Indicate the corr t the question numbe	ect answer by er on the left han	-	
1.1	Starting material used for the synthesis of L-Thyroxine is:				
	(a) 2 amino-5-chloro acetophenone	(b) phenyl alanin	е		
	(c) 2 amino-5-chloro benzophenone	(d) L-tyrosine			
1.2	One of the following antianxiety agent is an azaspirodecanedione derivative.				
	(a) Lorazepam	(b) Cycloheptadie	ene		
	(c) Meprobamate	(d) Buspirone			
1.3	Include the following drug under proper of	classification. NIFEDI	PINE.		
	(a) Quinoline derivative	(b) Aryl piperidin	es		
	(c) Iso Quinoline derivative ATE	(d) Pyridine deriv	ative/		
1.4	Acetazolamide can be synthesized from one of the following intermediates.				
	(a) 5 amino-2-mercapto-1, 3-thiazole				
	(b) 5 amino-2-mercapto-1, 3, 4-thiadiazole				
	(c) 5 amino-2-mercapto-1, 2, 3-thiadazole				
	(d) 5 amino-2-mercapto-1, 3, 4-tetrazol	e			
1.5	Choose the correct trichomes of Digitalis purpurea.				
	(a) Numerous covering trichomes and a few glandular trichomes				
	(b) Few covering trichomes				
	(c) Few glandular trichomes and few covering trichomes				
	(d) Few glandular trichomes				
1.6	PANAXADIOL is a constituent of				
	(a) Ginger (b) Jatamanst	(c) Ginseng	(d) Pepper		
1.7	The plant harmone which shows specific effect on the cell division is:				
	(a) Auxins (b) Abscisic Acid	(c) Cytokinins	(d) Ethylene		
1.8	One of the following condition is main chromatography.	tained in programm	ed temperature	ga	

(b) Temperature at the sample injection system is raised

(a) Temperature of the whole column is raised during analysis

Join discussion of this test paper at http://forum.gatementor.com

(c) Temperature at the detector is gradually raised (d) Temperature at the recorder alone is raised A BOLOMETER consists of 1.9 (a) two metals welded together (b) a thin blackened platinum strip in an evacuated vessel (c) deuterated triglycine sulphate (d) tungsten wire Choose the correct excipient for enhancing solubility in Tablet manufacture. 1.10 (b) Microcrystalline cellulose (a) PEG (c) Talc (d) Lactose Two or more ions present together can be determined successfully by 1.11 polarograph even if their half wave potentials overlap or interfere by (a) titration (b) complexation (c) filtration (d) heating **∟** Forum One of the following is a selective. SEROTONIN reuptake inhibitor 1.12 (a) Desipramine (b) Fluoxetine (c) Buspropion (d) Maprotiline 1.13 PLasmodial resistance of CHLOROQUINE is due to (a) induction of inactivating enzymes (b) change in receptor structure (c) increase in the activity of DNA repair mechanism (d) decreased carrier mediated drug transport 1.14 One of the following actions of opioid analgesics is medicated via kappa receptors (a) Cerebral vascular dilation (b) Euphoria (d) Physical dependence (c) Spinal analgesia One of the following drugs has activity against Herpes simplex virus type I and is used topically Systematic administration of the same results in bone marrow depression hepatic dysfunction and nephrotoxicity. (a) Acyclovir (b) Amantadine (c) Vadarabine (d) Idoxuridine A woman has to be treated for upper respiratory tract infection. Six years back 1.16 she was found hypersensitive to Penicillin V. The cultures now reveal a strain of Join All India Mock GATE Classroom Test Series - 2007 conducted by GATE Forum in over 25 cities all over India. Question

- (c) No known interaction
- (d) Harmful only in the presence of oxidizing agent
- 2. This question consists of TWENTY-FIVE sub-questions (2.1 – 2.25) of TWO marks each. For each of these sub-questions, four possible alternatives (A,B, C and D) are given, out of which ONLY ONE is correct. Indicate the correct answer by darkening the appropriate bubble against the question number on the left hand side of the Objective Response Sheet (ORS). You may use the answer book provided for any rough work, if needed.
- 2.1 In the glucuronidation reaction of OXAZEPAM - the functional group responsible
 - (a) —OH
- (b) —COOH (c) —SH
- (d) –NH₂
- 2.2. Benzhydryl bromide when treated with 2-dimethyl amino ethanol in presence of K_2CO_3 gives one of the following.
 - (a) 2-diphenyl ethoxy-N, N-dimethyl ethylamine
 - (b) 2-diphenyl methoxy-N, N-diethyl ethylamine
 - (c) 2-diphenyl methoxy-N, N-dimethyl ethylamine
 - (d) 2-diphenyl methoxy-N, N-diethyl methylamine
- 2.3. DEMECLOCYCLINE differs from CHLORTETRACYCLINE only by
 - (a) absence of —CH₃ group on carbon 6
 - (b) presence of —OH group on carbon 6

(c) absence of -N group on carbon 4 CH_3

- (d) absence of —OH group on carbon 3
- 2.4. Choose the IUPAC name for CARBAMAZEPINE.
 - (a) 5 [3-(dimethylamino) ethyl] 10-11 dihydro-5H dibenz [b, f] azepine
 - (b) 5 H dibenz [b, f] azepine-5-carboxamide
 - (c) 5 H dibenz [b, f] azepine-5-acid chloride
 - (d) 5 [3-dimethylamino) propyl] 10-11 dihydro-5H dibenz [b, f] azepine
- 2.5. RESERPINE is derived from

(a) Squalene

(b) Homoserine

(c) Tryptophan and Tryptamine

(d) Asparagine

C. g.						
2.6.	An alkaloid from Atropa bellado $C_{17}H_{23}O_3N$ having α D-22° when warn converted into	nna having the molecular formulaned with ethanolic alkaline solution is				
	(a) (-) Hyoscyamine	(b) (±) Hyoscyamine				
	(c) (+) Hyosamine	(d) (±) Hyoscine				
2.7.	Choose the appropriate description for ERGOT.					
	(a) Loosely arranged or in small more or less agglutinated angular masses					
	(b) A pseudoparenchyma formed by the interwoven closely appressed compact septate hyphae.					
	(c) The crystocarps have fallen out leaving corresponding oval perforations in the ramuli.					
	(d) Colourless septate hyphae about one quarter the width of a cotton trichome and they become twisted together.					
2.8.	Characteristic bands observed in the IR	spectra of alcohols result from				
	(a) —OH and C—O stretching	(b) —OH stretching				
	(c) C—O stretching only	(d) C—H bending only				
	CATE	F 0 77 172				
2.9.	Bulking agent used for parenteral prepa	ration is:				
	(a) Sodium metabisulphite	(b) Benzyl alcohol				
	(c) Carbolic acid	(d) Sorbitol				
2.10.	Identify the correct Non-flammable pro	Identify the correct Non-flammable propellant.				
	(a) Trichloro monofluromethane	(b) Dichloro monofluromethane				
	(c) Dimethyl ether	(d) Difluoromethane				
2.11.	Elastomer used in rubber stopper formulation is:					
	(a) Polybutadene	(b) Butyl stearate				
	(c) Titanium dioxide	(d) Butylated hydroxyl toluene				
2.12.	Schedule D as per D and C Act is concerned with					
	(a) list of drugs exempted from the provision of import of drugs					
	(b) diseases or ailments which a drug may not purport to prevent or cure					
	(c) requirements of factory premises					
	(d) list of prescription drugs					
2.13.	Official method for the analysis of CIPROFLOXACIN is by					
	(a) Potentiometry	(b) HPLC				
<u> </u>	(c) Gas chromatography	(d) Non-aqueous titration ted by GATE Forum in over 25 cities all over India. Ouestion

2.14.	The radio frequency radiation is associated with					
	(a) Light consisting of(c) Mass Spectromet	•	(b) Nuclear magnetic Resonance(d) E.S.R.		etic Resonance	
2.15.	How many gms of a solution?	a drug should be use	d in	preparing 500	ml of a 1 : 2500	
	(a) 0.2	(b) 0.02	(c)	0.4	(d) 1.25	
2.16.	The pyroelectric detector converts electromagnetic radiation into					
	(a) electrical signal	(b) fluorescence	(c)	electrons	(d) visible light	
2.17.	The mechanism of action of DIGITALIS is (a) decreases intracellular sodium concentration (b) inhibits sodium potassium ATPase (c) activates adenyl cyclase which produces cAMP (d) decreases release of calcium from sarcoplasmic reticulum					
2.18.	The mechanism of action (a) Inhibits topoisom (c) Inhibition function	nerase II ATE <i>Fol</i>	۲ (b)	Cross links DN Inhibits DNA p		
2.19.	One of the drugs w threatening cardiac d	hen co-administered ysrhythmia.	with	n TERFENADINI	may lead to life	
	(a) Lomefloxacin	(b) Clofazimine	(c)	Itraconozole	(d) Neomycin	
2.20.	Adverse effects of one of the drugs include amenorrhea, bone marrow depression, gastrointestinal distress and haemorrhagic distress, identify.					
	(a) Cyclizine	(b) Pyroxicam	(c)	Cyclophosphar	mide (d) Cimetidine	
2.21.	Varicella zoster is the causative organism for					
	(a) small pox		(b)	(b) dermatophytosis		
	(c) herpes		(d)	infectious mor	ocucleosis	
2.22.	One of the following is confirmed by DNA diagnosis test.					
	(a) Hyperuricaema		(b)	Cystic fibrosis		
	(c) Acute pancreatiti	S	(d)	Hyper lipidaen	nia	
2.23.	The conversion of Fructose-1, 6-biphosphate to Glyceraldehyde-3-phosphate is catalysed by					
	(a) Phospho-glycera	te kinase	(b)	Enolase		

Join All India Mock GATE Classroom Test Series - 2007 conducted by GATE Forum in over 25 cities all over India. Question Papers including section tests and full tests are designed by IISc alumni according to the latest syllabus. Percentile, All India Rank, interaction with IISc alumni in our online discussion forums, and more. For more details,

(c) Aldolase

(d) Triose phosphate isomerase

2.24. MORPHINE undergoes microsomal oxidation by

(a) N-dealkylation

(b) Aromatic hydroxylation

(c) Oxidative deamination

(d) O-dealkylation

2.25. SULFASALAZINE is a prodrug that is activated in the intestine by bacterial enzymes. The enzyme responsible is:

(a) Azoreductase

(b) Choline esterase

(c) Glucuronyl transferase

(d) Amylase

SECTION - B

This section consists of TWENTY questions of FIVE marks each. Attempt ANY FIFTEEN questions. Answers must be given in the answer book provided. Answer for each question must start on a fresh page and must appear at one place only. (Answers to all parts of a question must appear together).

- 3. (a) Which is the active isomer of dimethyl stilbestrol?
 - (b) Inhibition or decreased enzyme activity can result from different types of interaction namely:
 - (i) Non-covalent interaction between the enzyme and drug.
 - (ii) Covalent interaction between the enzyme and drug.
 - (iii) Mutually exclusive binding of the substtate and inhibitor.
 - (iv) Binding on an allosteric site on the enzyme.
- 4. Complete the following reactions by giving appropriate structures:
 - (a) 2, 6-dimethyl aniline is treated with chloroacetyl chloride
 - (b) Product at (a) is treated with dimethylamine to get the final product.
 - (c) What is the generic name of the final product?
- 5. Complete the following by giving appropriate structures at A, B, C, D, E.

$$\xrightarrow{C_2H_5OH} A \xrightarrow{C_2H_5ONa} B \xrightarrow{160^\circ - 170^\circ C} C \xrightarrow{C_2H_5ONa} D \xrightarrow{H_2N-\stackrel{\circ}{C}-NH_2} \to E$$
Benzyl cyanide
$$COOC_2H_5$$

- Following modifications of the prototypes of HYDROCORTISONE represent attempts to increase glucocorticoid activity while decreasing mineralocorticoid activity:
 - (a) Introduction of double bond at C_1 and C_2 .
 - (b) Fluorination at C_{\circ} .
 - (c) Introduction of double bond at C_1 and C_2 with fluorination at C_9 .

Join **All India Mock GATE Classroom Test Series - 2007** conducted by GATE Forum in over 25 cities all over India. Question Papers including section tests and full tests are designed by IISc alumni according to the latest syllabus. Percentile, All India Rank, interaction with IISc alumni in our online discussion forums, and more. For more details, visit

- (d) Double bond C_1 and C_2 , fluorination at C_9 and a hydroxyl at C_{16} .
- (e) Double bond at C_1 and C_2 , fluorination at C_9 , a methyl at C_{16} .

Give the generic names of the products formed.

- 7. (a) Name the part of Syzygium aromaticum which is used officially as the drug.
 - (b) Where does the ovary situated in the above drug.
 - (c) Which type of typical stomata is present in the above drug.
 - (d) The G.C. analysis of the volatile oil from the above drug gives two characteristic major peaks. Name the probable constituents.
- 8. PAPAVERINE an alkaloid of molecular formula $C_{20}H_{21}O_4N$ undergoes degradation reactions. Give only the structural formulae of the products formed in the following reactions.
 - (a) With hot concentrated Potassium permanganate
 - (b) With cold dilute Potassium permanganate
- 9. Following statements are characteristic for particular terms used. Identify and name the terms:
 - (a) In plant breeding it is a possible means of combining in a single variety the desirable characters of two or more lines, variety or species and occasionally of producing new and desirable characters not found in either parent.
 - (b) Changes in the genetic make up of the plant.
 - (c) Chromosomes can be grouped not in pairs, but in threes, fours or higher numbers.
 - (d) Plants occur with one or more chromosomes extra to the somatic number
 - (e) Plant protoplasts which can be maintained in culture and can be induced to fuse either with others of the same or different species.
- 10. List the five important components in mass spectrometer.
- 11. In the assay of PYRIDOXINE HYDROCHLORIDE I.P.
 - (a) Name the solvent used for dissolution of sample
 - (b) Name the inorganic reagent which is added subsequently
 - (c) What is the reason for its addition?
 - (d) Name the tirant used.
 - (e) Give the structure of the final product.

12. (a) Give the number of NMR signals given by the following compounds:

 $CH_3 - C - CH_3$ $CH_3 - CH - CH_3$ (ii) \mid OH

- (b) Why a solvent free of proton should be used for conventional NMR spectroscopy.
- (c) Name the reference material used for proton spectro in non-aqueous medium.
- (d) Why the signals in NMR are split? Answer in one sentence only.
- 13. List the five steps involved with capsule shell manufacture in an automatic process.
- 14. Give five advantages of loaded RBC as drug delivery system.
- 15. Penicillin solution has a half life of 21 days. How long will it take for the potency to drop to 80% of initial potency. Penicillin undergoes first order kinetics. Give all steps in the calculation.
- 16. List the five official tests which are performed for plastic containers for injectables.
- 17. Give the names of:
 - (a) A vasodilator that can cause hirsuitism.
 - (b) An ACE inhibitor that may cause renal damage in the foetus.
 - (c) A local anaesthetic that can interfere with the action of quanethiding.
 - (d) A class of vasodilators that is useful to reduce proteinuria in diabetics.
 - (e) A receptor, blocking of which is important for neuroleptic action.
- 18. (a) What are the two major limitations to the general use of immuno suppressive agents? Answer in one sentence each.
 - (b) Name two main kinds of motor disturbances produced by neuroleptic drugs.
 - (c) Name the class of drug that is dangerous when the person had a meal with a high content of fermented foods.
- 19. (a) Give the name of a Phosphonoformate derivative which has antiviral activity.
 - (b) What is its mechanism of action? Answer in one sentence only.
 - (c) Name two major adverse effects of the drug.

- 20. Given below are some typical bio-chemical reactions. Write the names of the enzymes which catalyses these reactions:
 - (a) $CH_3CH_2OH + NAD^+ \longrightarrow CH_3CHO + NADH + H^+$
 - (b) Glucose + ATP \longrightarrow Glucose-6-phosphate + ADP + H^+
 - (c) Pyruvate \longrightarrow Acetaldehyde + CO_2
 - (d) Glyceraldehyde-3-phosphate ——— Dihydroxy acetone phosphate
 - (e) Glutamate + NH_3 + ATP \longrightarrow Glutamine + ADP + Pi
- 21. (a) What is the chemical nature of Glucogon?
 - (b) For which biochemical reaction is it required for?
 - (c) Give the name of the clinical condition for which it is used for.
 - (d) What type of dosage form in which it is used?
 - (e) Where is it secreted?
- 22. (a) In Type I and Type II hyper sensitivity reactions name the corresponding antibodies.
 - (b) Name a mood elevator which is an amphetamine analog.
 - (c) The drug at (b) when co-administered with, which class of drug can result side effects like arrhythmia and hypertension.
 - (d) When digoxin is used with Omeprazole, Plasma levels digoxin is increased or decreased?
