NATIONAL TALENT SEARCH EXAMINATION, 2015-16 STATE LEVEL EXAMINATION – QUESTION BOOKLET SCHOLASTIC APTITUDE TEST

CLASS X

MEDIUM:- ENGLISH

DATE: 8 NOVEMBER 2015, DAY: SUNDAY

[Time: 14.15 P.M. to 15.45 P.M.]

Time: 90 Minutes Maximum Marks: 100

SCHOLASTIC APTITUDE TEST 1. Fuse wire should be placed in the path of								
(1) neutral (3) earth (4) none of these 2. The average drill velocity of electrons in a wire not connected to a cell is	_	SCHOLASTIC APTITUDE TEST						
(3) earth (4) none of these 2. The average drill velocity of electrons in a wire not connected to a cell is	1.					Dhaaa		
 The average drill velocity of electrons in a wire not connected to a cell is		٠,						
(1) zero (3) infinite (4) always positive (4) always negative 3. Most or the power stations produce		(3)	earui		(4)	none or these		
(1) zero (3) infinite (4) always positive (4) always negative 3. Most or the power stations produce	2.	The	average drill velocity of electrons in a wire r	not co	onnected	to a cell is		
3. Most or the power stations produce (1) direct current (3) potential difference (4) alternating (current 4. Colour of scattered light depends (1) only on size of scattering particle (2) only on length of travelling light. (3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (2) 1.67 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column II (I) thickening of eye lens (A) focal length increases (i) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (ii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (2) (I)-(B)-(ii), (II)-(B)-(ii) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is (Charge on one electron = 1.6 × 10 ⁻¹⁹ C) (1) 4.8 A (3) 0.48 A (4) 0.1 A 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles			- · · · · · · · · · · · · · · · · · · ·					
(1) direct current (3) potential difference (4) alternating (current 4. Colour of scattered light depends (1) only on size of scattering particle (2) only on length of travelling light. (3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (2) 1.67 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (A) focal length increases (i) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (ii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (2) (I)-(B)-(ii), (II)-(B)-(ii) (3) (I)-(A)-(i), (II)-(B)-(iii) (4) (I)-(A)-(ii), (II)-(B)-(ii) (5) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is		(3)	infinite		(4)	always negative		
(1) direct current (3) potential difference (4) alternating (current 4. Colour of scattered light depends (1) only on size of scattering particle (2) only on length of travelling light. (3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (A) focal length increases (II) thining of eye lens (B) focal length decreases (II) (II)-(A)-(II)-(A)-(II) (3) (I)-(A)-(I), (II)-(B)-(II) (3) (I)-(A)-(I), (II)-(B)-(II) (4) (I)-(B)-(II), (II)-(B)-(II) (5) (7) In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is	3.	Mos	et or the power stations produce					
 Colour of scattered light depends					(2)	electric power		
 (1) only on size of scattering particle (2) only on length of travelling light. (3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (2) 1.67 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I Column II Column II (I) thickening of eye lens (A) focal length increases (i) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (iii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (2) (I)-(B)-(ii), (II)-A-(i) (3) (I)-(A)-(i), (II)-(B)-(ii) (4) (I)-(A)-(ii), (II)-(B)-(i) 7. In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is		(3)	potential difference		(4)	alternating (current		
 (1) only on size of scattering particle (2) only on length of travelling light. (3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (2) 1.67 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I Column II Column II (I) thickening of eye lens (A) focal length increases (i) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (iii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (2) (I)-(B)-(ii), (II)-A-(i) (3) (I)-(A)-(i), (II)-(B)-(ii) (4) (I)-(A)-(ii), (II)-(B)-(i) 7. In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is	4.	Colo	our of scattered light depends					
(3) both size of scattering particle and length of travelling light (4) on colour of incident light 5. If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (3) 1.3 (2) 1.67 (3) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I Column II Column II Column III (1) thickening of eye lens (A) focal length increases (i) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (iii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (3) (I)-(A)-(i), (II)-(B)-(ii) (4) (I)-(A)-(ii), (II)-(B)-(i) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is (Charge on one electron = 1.6 × 10 ⁻¹⁹ C) (1) 4.8 A (2) 1 A (3) 0.48 A (2) 1 A (3) 0.48 A (4) 0.1 A 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles								
 (4) on colour of incident light If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (3) 1.3 (4) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (A) focal length increases (ii) ciliary muscles contract (II) thining of eye lens (B) focal length decreases (iii) ciliary muscles elongate (1) (I)-(B)-(i), (II)-(A)-(ii) (2) (I)-(B)-(ii), (II)-A-(i) (3) (I)-(A)-(i), (II)-(B)-(ii) (4) (I)-(A)-(ii), (II)-(B)-(i) 7. In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is								
 If speed of light travelling R from air to a medium decreases by 40%, find the refractive index of the medium with respect to air. (1) 2.5 (3) 1.3 (4) 1.25 Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (II) thining of eye lens (III) thining of eye lens (III) thining of eye lens (III) (I)-(B)-(i), (II)-(A)-(ii) (III) (III)-(B)-(ii) (III)-(B)-(ii) (III) (III)-(B)-(ii) (III)-(B)-(ii) In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is				of trav	elling lig	ht		
respect to air. (1) 2.5 (3) 1.3 (2) 1.67 (3) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (II) thining of eye lens (III) thining of eye l		(4)	on colour of incident light					
respect to air. (1) 2.5 (3) 1.3 (2) 1.67 (3) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I Column II Column II Column III (I) thickening of eye lens (II) thining of eye lens (II) thining of eye lens (II) (I)-(B)-(i), (II)-(A)-(ii) (II)-(B)-(ii) (II)-(A)-(ii) (II)-(A)-(ii) (II)-(A)-(ii) (II)-(A)-(ii) (II)-(A)-(ii) (II)-(B)-(ii) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is (Charge on one electron = 1.6 × 10 ⁻¹⁹ C) (1) 4.8 A (3) 0.48 A (4) 0.1 A 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles	5.	If sp	peed of light travelling R from air to a mediun	n dec	reases b	ov 40%, find the refrac	tive in	ndex of the medium with
(1) 2.5 (3) 1.3 (2) 1.67 (3) 1.25 6. Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (II) thining of eye lens (II) thining of eye lens (II) (II)-(B)-(i), (II)-(A)-(ii) (II)-(B)-(i), (II)-(B)-(ii) (II)-(B)-(ii), (II)-(B)-(ii) (II)-(B)-(ii), (II)-(B)-(ii) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is						,		
 Choose the correct alternative which matches second and third column with first column: Column I (I) thickening of eye lens (II) thining of eye lens (II) thining of eye lens (III) (III) (III) (III) (III) (IIII) (IIIII) (IIIII) (IIIIIIII					(2)	1.67		
Column I (I) thickening of eye lens (II) thining of eye lens (II) thining of eye lens (II) thining of eye lens (II) (I)-(B)-(i), (II)-(A)-(ii) (II)-(B)-(i), (II)-(A)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is		(3)	1.3		(4)	1.25		
(I) thickening of eye lens (II) thining of eye lens (II) thining of eye lens (II) thining of eye lens (II) (I)-(B)-(i), (II)-(A)-(ii) (II)-(B)-(i), (II)-(A)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) 7. In an electric circuit 1 x 10 ¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is	6.	Cho	ose the correct alternative which matches s	econ	d and thi	rd column with first co	lumn	:
(II) thining of eye lens (II) thining of eye lens (II) (I)-(B)-(i), (II)-(A)-(ii) (II)-(B)-(i), (II)-(A)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(i), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(A)-(ii), (II)-(B)-(ii) (II)-(A)-(ii), (II)-(A)-(A)-(A)-(A)-(A)-(A)-(A)-(A)-(A)-(A		Colu	ımn I	Colu	ımn II		Colu	ımn III

In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is				(A)			(i)	
 (3) (I)-(A)-(i), (II)-(B)-(ii) (4) (I)-(A)-(ii), (II)-(B)-(i) 7. In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is				(B)			(iii)	ciliary muscles elongate
 7. In an electric circuit 1 x 10¹⁸ hydrogen ions are travelling per second in the right direction while double number of electrons are travelling per second in left direction, the total current through the path is								
electrons are travelling per second in left direction, the total current through the path is		(3)	(I)-(A)-(i), (II)-(B)-(ii)		(4)	(I)-(A)-(ii), (II)-(B)-(i)		
electrons are travelling per second in left direction, the total current through the path is	7.	In a	n electric circuit 1 x 10 ¹⁸ hydrogen ions are t	ravel	lling per s	second in the right dire	ection	while double number of
(1) 4.8 A (2) 1 A (3) 0.48 A (4) 0.1 A 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles								
 (3) 0.48 A (4) 0.1 A 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles 		(Cha	arge on one electron = 1.6×10^{-19} C)					
 8. Choose the correct alternative, in relation to properties of magnetic lines of force: (1) magnetic lines of force start from south pole and end on north pole (2) magnetic lines of force intersect each other at the poles 					(2)	1 A		
(1) magnetic lines of force start from south pole and end on north pole(2) magnetic lines of force intersect each other at the poles		(3)	0.48 A		(4)	0.1 A		
(1) magnetic lines of force start from south pole and end on north pole(2) magnetic lines of force intersect each other at the poles	8.	Cho	ose the correct alternative, in relation to pro	pertie	es of mad	gnetic lines of force:		
(2) magnetic lines of force intersect each other at the poles								
(3) magnetic lines of force are far from each other where the field is strong		(2)	magnetic lines of force intersect each other	r at th	ne poles	·		
		(3)	magnetic lines of force are far from each of	ther v	where the	e field is strong		

(4) tangent at any point on the magnetic lines of force gives the direction of the magnetic field at that point

9.		ose the correct alternative which matches s ımn I	econd a		rd columns with first c		n: mn III
	(I)	Tap key	(a) —	+ (/	<u> </u>	(i)	to be connected in series
	(II)	Ammeter	(b)	+-(<u> </u>	(ii)	to be connected in parallel
	(III)	Volmeter	(c) —	-	-	(iii)	detects presence of cutrrent
	(1)	Galvanometer (I)-(b)-(ii), (II)-(c)(iv), (III)-(a)-(i), (IV)-(d)-(iii) (I)-(a)-(i), (II)-(b)-(iii), (III)-(c)-(iv), (IV)-(d)-(iii) (I)-(d)-(iii), (II)-(b)-(iv), (III)-(a)-(i)-, (IV)-(C)-(I)-(c)-(iv), (II)-(a)-(i), (IV)-(b)-(iii))	<u> </u>) 	(iv)	to keep circuit open
10.	Cho (1) (2) (3) (4)	ose the wrong statement related to virtual ir images are always produced by plane mirr images are always erect image cannot be obtained on the screen imge is formed at I\ point where reneded -a	ors only		rays appear to meet		
11.	(1)	identifies quality of sound in hun Nerve impluse Cochlea	nan ear.	(2) (4)	Pinna Ear drum		
12.	Clea (1) (3)	aning of dust from carpet is due to inertia of motion inertia of direction		(2) (4)	inertill of rest momentum		
13.	Chro	nge the following metals in increasing resist omium, Nickel, Manganese, Iron Nickel-Iron-maganese-Chromium Manganese-Chromium-Iron-Nickel	tivities	(2) (4)	Nickel-Iron-Chromiur Chromium-Iron-Mang		
14.	The (1) (3)	total number of elements pre~f.'nt In 4th pe 8 32	riod of m	noder (2) (4)	n periodic table is 18 12		
15.	(1)	n of the following medicines is used for Indiç Antibiotic Anulgesic	gestion?	(2) (4)	Antacid Antiseptic		
16.		ch of the following is an ore of mercury? Bauxite Cinnabar		(2) (4)	Haematite Dolomite		
17.	(1)	O ₃ (s) whell mixed with water. temperature of Endothermic reaction Cooling reaction	solution	falls. (2) (4)	This reaction is: Exothermic reaction Heating reaction		
18.	(1)	nonium chloride is a salt of: Weak Acid and Weak Base Strong Acid and Strong Base		(2) (4)	Weak Acid ami Stron Strong Acid and Wea		
19.	Wha	at is the IUPAC name of the following compo	ound?	(ÇH3		
		H ₂ C-	-сн=c				
	(1) (3)	pent-2-ene pent-3-ene		(2) (4)	pent-I-ene 1-methyl-but-2-ene		

Pure copper acts as Cathode

Impure Copper acts as Cathode

(b)

(2)

(4)

(b), (c)

(b), (d)

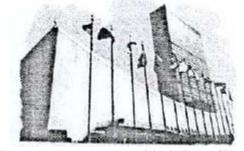

20.	Which of th	ne following is	corretl electron	dot structure of	oxvaen?
20.	VVIIICII OI U	ic ioliowing is	COLLEGE CICCHOLL	dol silucture or	OAYGCII:

21. What type of oxide would Eka-Aluminium (Gallium) form?

- (1) GaO₃ Ga_3O_2 (2) (3) Ga_2O_3 (4) GaO
- 22. During Electrolytic refining of copper:
 - (a) Pure Copper acts as Anode (c) Impure Copper acts as Anode
 - (1) (a), (b) (3) (a), (d)
- 23. Which of the following i8 not an example of single di8placement reliction?
- (2) $Zn + CuSO_4 \rightarrow ZnSO_4 + Cu$ (1) CuO + H₂ \rightarrow H₂O + Cu (3) AgNO₃ + NaCl → AgCl + NaNO₃ (4) $Zn + 2HCI \rightarrow ZnCI_2 + H_2$
- The ratio of Hydrogen and Oxygen by mass in water is: 24.
 - (2)8:1 (1) 1:8 (3) 2:1 (4) 1:2
- 25. Which of the following reactions is involved In Black and White photography?
 - (2) $2AgBr \xrightarrow{Sunlight} 2Ag + Br_2$ $(1) \quad 2Cu + O_2 \xrightarrow{\Lambda} 2CuO$ (4) $CaCO_3 \xrightarrow{\Lambda} CaO + CO_2$ (3) $ZnO + C \rightarrow Zn + CO$
- 26. Which of the following reactions will not occur?
 - (2) $Cu + 2HCI \rightarrow CuCl_2 + H_2$ $Mg + H_2SO_4 \rightarrow MgSO_4 + H_2$ $2AI + 6HCI \rightarrow 2AICI_3 + 3H_2$ (4) $Fe + 2HCI \rightarrow FeCl_2 + H_2$
- 27. Which organism bn'llkdown th" food material into simple substances oOutside the body and then absorb it?
 - (1) Mushroom (2) Cuseula (3) Ticks worms Tape
- Thereceives deoxygenated blond collected, from different organs of the body via large vein called 28. vena cava.
- (1) Left atrium Right atrium (3) Right ventricle Left ventricle 29. Which plants has a trap, which looks and snll'lls like a flower to insects?
- - (1) Drosera (2) Balsam (3) Lotus (4) Venus Fly trap
- 30. Which of the following orglmisms hlwe the nervous system is at a very primitive stage of development?
- (1) Amoeha (2) Hydra (3) Earthworm Paramoecium 31. The vegetative reproduction in Bryophyllum takes place through which organ?
- (1) Root (2) Stem
- (3) Leaf (4) Seed A pollen tube, produced from the pollen grain, contains...... male gametes. 32. (1) one (2) Two Seven (4) Eight (3)
- In Menders dihybrid cross how many groups of phenotypic characters are found in F2 generation (second filial
 - (1) Four (2) Two (3) one Sixteen

- FIITJ€€ THE FUNDAMENTAL APPROACH... SAT-NTSE'15-4 34. According to palaeontological evidences, identify the correct sequence of arumal development: (1) Fish → Reptiles → Amphibians → Birds → Mammals Fish → Reptiles → Oirds → Amphibians → Mammals (2)Fish → Amphibians → Birds → IWptiles → Mammals (3)(4) Fish → Amphibians → Reptiles → Birds → Mammals 35. According to origin, identify the secondary air pollutant: Ash (1) SO₃ (3) Smoke Radioactive compound (4) 36. In residential area at night, the standard limit of sound intensity is Decibel. 70 (4) (3) 45 40 The aboorption of ust'ful malt'rial from urine before it is passed out takes place through epithelium tissue. 37. (1) Cucoidal (2) Ciliated columnar (3) columnar Stratified squamous 38. Which is the smallest unit of classification of organisms? **Species** (2)(3) Family Order 39. In female ovari"s secrete normone. (1) Estrogen Testosterone (3) Auxin (4) Gibberellins 40. Liver gland secretes...... Bill juice (1) Pancreatic juice (3) Gastric juice (4) Various digestive juice What was the filet that caused the failure of the League of Nations? Choose from the following alternative: 41. (1) Hitler's attack on Austria The issue of Sweden-Finland and Holland (2)To take vote in Saar provonce Attack of Italy on Kaifu island 42. Which one of the following nat inns was not member at the time of G-7 organization established? (1) Holland Japan (3) Italy Franee 43. Which one of the following was Supreme god of Greeks? (1) hera Apollo (3)Zeus Venus 44. The followingpairs are given about discoverer and discovery. Choose incorrect pair from the following (1) Mungopark - Discovered basins of the Niger river Livingstone - Disco\'ered basins of the Zambezi river
 - Christopher Columbus Discovered American Continent (3)
 - (4) Bartholomew Dias Circumnavigation of the earth
- 45. Which one of the following reasons is inappropriate about cold war?
 - (1) Supremacy between America and Russia
 - Non-Alliance Movement
 - Communism in Soviet Russia (3)
 - (4) Differences in philosophical thinking
- 46. The office which shown in the given picture belongs to which International Organization?

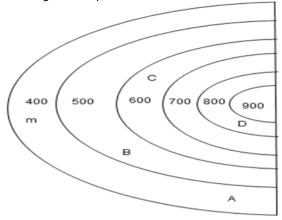

- **United Xations Organization**
- International Court

- Lellque of Nations
- (4) Internation Worker's Organization

47.	Arrange the following events in chronological order: (I) Treaty between England-France (II) A political recolution in Turkey (III) A friendship treaty between England-Japan (IV) A frindship traty between England-Russia (1) (I), (III), (II), (IV) (3) (III), (I), (IV), (II)	(2) (4)	(II), (I), (IV), (III) (IV), (III), (II) (I)
48.	"The rule of oncolion is pwr better than hundrt'd rats" W (I) Montesquieu (3) Mirabo	ho ha (2) (4)	ad prodaimpd this statement? Voltaire Napoleon Bonaparte
49.	Which one of the princely state was merged under the p (1) Satara (3) Sambalpur	(2) (4)	kt of maladministration? Nagpur Ayodhya
50.	Educational institutions were established in the colonies (1) To get Western education (2) To eradicate ignorance of the people in the colony (3) To get secondary grade staff for the administrative (4) To popularize and spread their culture		
51.	Which one is the destructive effect of Imperialism? (1) Spread of Education (3) Physical Reformations	(2) (4)	Intellectual Change Trade of Slaves
52.	Who took advantage of the dispute between France and (1) Kaiser William II (3) Bismarck		about religious and colonial problems? Hitler Benito Mussolini
53.	During the cold war which country was not a part of the America? (1) Pakistan (3) Indonesia	(2) (4)	TO TREATY' established under the leadership of Philippines Thailand
54.	Which revolution made an attempt to create a social ord (1) Industrial Revolution (3) Russian Revolution	der wi (2) (4)	ithout religion, class and exploitation? Meiji Revolution Formation of United Nations Organization
55.	Who is considered as 'The Father of China'? (1) Dr. Sun-Yat-Sen (3) Kang-Yu-Wei	(2) (4)	Yuan-Shih-Kai Mao-Tse-Tung
56.	The region situated to the foothills of Jalpaiguri and Dar (1) Marshy area (3) Duars		g is known as Flood plain Doab
57.	 Which group has correct order of rivers from south to not (1) Cauvery → Godavari → Mahanadi → Tungabhadra (2) Cauvery → Mahanadi → Tungabhadra → Godavari (3) Cauvery → Tungabhadra → Godavari → Mahanadi (4) Cauvery → Godavari → Tungabhadra → Mahanadi 	a ri di	n the Deccan Plateau region?
58.	Which of the following factors is going to reduce the soil (1) Excess use of soil (3) Excess use of chemical fertilizers	(2) (4)	radation? Excess irrigation Crop rotation method
59.	Which of the following states do not share land border v (1) Meghalaya (3) Mizoram	vith M (2) (4)	lyanmer? Manipur Nagaland
60.	Mining occupation is well developed on the Chhota Nag (1) Road transport (3) Generation of employment	(2) (4)	olateau because: Availability of minerals Labour supply
61.	The largest wool market of Asia is (1) Barmer (3) Jaisalmer	(2) (4)	Bikaner Jodhour

The direction of river in the following contour pattern is:

- (1) D to B
- (3) A to C

- B to C
- (4) C to D

- 63. Find the wrong pair:
 - (1) Coast of Gujrat Region of gulf
 - (3) Malabar Coast Region of backwters
- Konkan Coast Region of many headlands
- Coromandel Coast Delta region of Narmada
- The correct order of rivers of Punjab-Haryana plains from North to South is 64.
 - (1) Beas → Satluj → Ghaggar

(2) Ghaggar → Beas → Satluj

(3) Satluj → Beas → Ghaggar

- (4) Satluj → Ghaggar → Beas
- Out of the total area under cultivation of Himachal Pradesh how much area is under irrigation? 65.
 - (1) 1/4

(2) 1/5

1/3 (3)

- (4) 1/2
- The largest physical division of India is 66.
 - (1) The North Indian Plain

- The Mountainous region in the North
- The Peninsular plateau Region
- The Coastal Plains
- 67. Which of the following is a one-dimensional diagram?
 - (1) Qudrilateral

Divided Circle (2)

(3) Divided Rectangle

- (4) A line graph
- 68. The famous place of 'Kumbha Mela' from the Central Highlands is:
 - (1) Ujjain

(3) Prayag

- (4) haridwar
- Garhjat Hills occupied the North-Western part of which state? 69.
 - Tripura

West Bengal (2)

(3) Meghalaya

- (4) Odisha
- 70. What is the cause of not getting High grade coal in Meghalaya?
 - (1) Less proportion of limestone

(2) Less content of Sulphur

Greater proportion of coke

- (4) Greater proportion of Sulphur
- 71. "In a democracy each adult citizen must have one vote and each vote must have one vaolue. "Which one of the following countries is irreverent for this statement?
 - (1) Russia

(2) China

(3) Fiji

United Arab Emirates

- 72. What is recall?
 - (1) To call the representatives back
- (2) Presenting proposal of Law by the people
- Taking decisions on important public issues on the basis of public opinion
- To change the government
- The first meeting of the Constituent Assembly was held on 73.
 - (1) 26th January, 1950 (3) 10th February, 1948

26th November, 1949 (2)

- 09th December, 1946
- 74. seats are reserved for the Scheduled Tribes in Lok Sabha.
 - (1) 43

(3) 41

(4) 45

75 .	Which one of the following inequalities is excess then de	emoc	racy remains only in name?
	(1) Economic	` '	Social
	(3) Cultural	(4)	Political
76.	In Socialism, the decisions about production depend upon	on th	e objectives and priorities laid down by
70.	(1) Food Corporation		Central Planning Commission
	(3) Reserve Bank		Central Productive Body
		()	
77 .	How much percentage of share of Tertiary Sector is in the	he Gı	ross Domestic Product in India 2011?
	(1) 18	(2)	26
	(3) 45	(4)	56
70	Consumer must be provided with accurate information of	shout	quality purity price quantity and the standard of the
78.	Consumer must be provided with accurate information a goods and services. What right of a consumer is this?	about	quality, purity, price, qualitity and the standard of the
	(1) Right to choose	(2)	Right to safety
	(3) Right to be informed		Right to consumer education
	()	()	S
79.	Which is incorrect reason out of the following reasons to	incr	ease in demand for goods and services?
	(1) Lopsided production	(2)	Increase in export
	(3) Reduction in tax	(4)	Availability of credit
90	What factors are included as 'Arteriose' to an accommu)	
80.	What factors are included as 'Arterises' to an economy? (1) Small scale and Cottage Industries		Transportation and Communication
	(3) Capital and Labour Supply		Government Policy and Credit Supply
	(b) Sapital and Eabout Supply	(-)	Covernment I only and Orean Supply
81.	In the year 2013, Pravin saves Rs. 1 on the first day, Rs	s. 3 c	on the second day, Rs. 5 on the third day and so on.
	Find the total amount of his saving in that year.		
	(1) Rs. 133225	(2)	Rs. 132225
	(3) Rs. 123225	(4)	Rs. 134225
00	Consoli has to now Do. 400 for 40 applies and 44 aways	_ 14 -	
82.	Ganesh has to pay Rs. 482 for 19 apples and 11 guavas guavas purchased, then he would have paid Rs. 64 less		
	1 apple than 1 guava?). I III	a now mach more amount he has to pay to purchase
	(1) Rs. 19	(2)	Rs. 8
	(3) Rs. 11		Rs. 7
		()	
83.	Find the quadratic equation whose one root is $2 + \sqrt{5}$.		
	(1) $x^2 - 4x + 1 = 0$	(2)	$x^{2} - 4x - 1 = 0$ $x^{2} - 4x - 3 = 0$
	(3) $x^2 - 4x + 3 = 0$	(4)	$x^2 - 4x - 3 = 0$
84.	In a frequency distribution table, modal value of the wag		
	$f_m = x + 15$; $f_1 = x$; $f_2 = x + 5$. Find the upper limit of t		
	(1) 96.5	(2)	97.5
	(3) 98.5	(4)	
85.	Given the equality of the following determinants. Find th	e val	ue of (a + b).
	$\begin{vmatrix} 4 & 3 \\ 6 & a \end{vmatrix} = \begin{vmatrix} 4 & 3 \\ 4 & 4 \end{vmatrix}$	6 b	
	6 a 4	4 5	
	(1) 8	(2) (4)	12
	(3) 14	(4)	16
86.	If $a = \sqrt{6} + \sqrt{5}$; $b = \sqrt{6} - \sqrt{5}$, then find the value of 2a	$^{2} - 5$	$ab + 2b^2$.
	(1) 36	(2)	37 41
	(3) 39	(4)	41
87.	Out of group of Swans, $\frac{7}{2}$ times the square root of num	ber o	of Swans are playing on the shore of the tank.
.	2		or ename and playing on the chord of the tarin.
	Remaining two are quarreling in the water. Calculate the	e tota	I number of Swans. Find the number of Swans
	playing on the shore of the tank.		
	(1) 14, 16	(2)	16, 12 16, 14
	(3) 14, 12	(4)	10, 14
88.	A coin and a die is tossed simultaneously. Find the prob	ahili+	y of the event that 'tail' and a prime number turns
.	up?	abiiil	y or the event that tall and a prime number tulls
	•	/-·	1
	$(1) \frac{1}{2}$	(2)	-
	—		

- In a frequency distribution median is $\frac{11}{10}$ times the mean, and mode is 5.2. Find the median. 89.

- If $\frac{x}{2y+z-x} = \frac{y}{2z+x-y} = \frac{z}{2x+y-z}$ and $x+y+z \neq 0$, then what is each ratio equal to: 90.

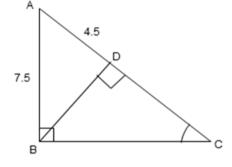

(3) 2

- In the above figure $\triangle ABC$, m $\angle B = 90^{\circ}$, BD \perp AC, AD = 4.5, AB = 91. 7.5, then find A(\triangle BDC) : A(\triangle ABC)
 - (1) 16:25

(2) 4:5

(3) 25:16

(4) 5:4

- If $\sin \theta = -0.6^{\circ}$, then find the quadrant from which the terminal arm making an angle of θ° passes. 92.
 - (1) I quadrant

(2) Il quadrant

(3) III quadrant

- (4) IV quadrant
- 93. A roller of diameter 1.4 m and length 1.4 m is used to press the ground having area 3080 sq.m. Find the number of revolutions that the roller will make to press the ground.
 - (1) 700

(2)500

(3) 1000

- (4) 800
- If a line passes through the intersection point of the graphs of the lines x + 2y = 7 and x y = 4 and the origin, then find the equation of the line.
 - (1) y = 0.5 x

(3) y = 0.2x

- (4) y = -2x
- 95. In \triangle ABC, m \angle BAC = 140°, 'P' is the centre of the circumcircle of \triangle ABC. Find m \angle PBC.
 - (1) 40°

 $(2) 50^{\circ}$

- (4) 100°
- 96. If the ratio of the radii of the circular ends of a conical bucket whose height is 60 cm is 2:1 and addition of the areas is 770 sq.cm. Find the capacity of the bucket in litres.
 - (1) 21.56 litres

(2) 215.6 litres

(3) 21.560 litres

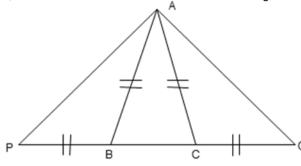

- (4) 2156 litres
- In the above figure $\triangle ABC$, DE II BC, A($\triangle ADE$) = 48 sq.cm., $\frac{AD}{DB} = \frac{4}{5}$. 97.
 - Find the area of \triangle BEC.
 - (1) 60 sq. cm

(2) 95 sq. cm (4) 135 sq.

(3)108 sq. cm

cm

98. In the above figure $\triangle APQ$, P-B-C-Q and AB = AC = PB = CQ. Find the angle congruent to $\angle PAQ$.

- (1) ∠ACP
- (3) ∠APC

- (2) ∠ABP
- (4) ∠BAQ

99. Find the value of
$$\frac{\sin 48^{\circ} + \cos 42^{\circ}}{\cot 42^{\circ}} - \frac{1}{\sec 48^{\circ}}$$

(1) cos 48°

(2) sin 48°

(3) sec 48°

- (4) cot 42°
- **100.** The incircle of \triangle ABC touches the sides AB, BC and AC in the point P, Q and R respectively. If AP = 7 cm, BC = 13 cm, find the perimeter of \triangle ABC.
 - (1) 27 cm

(2) 30 cm

(3) 40 cm

(4) 41 cm
