

**Qn. 14**

Convert  $(101.101)_2 = (\quad)_{10}$ ?

விடை எபாய்து படிக்கவூக்.

**Ans**

$$\begin{aligned} 101.101 &= 1 \times 2^2 + 0 \times 2^1 + 1 \times 2^0 + 1 \times 2^{-1} + 0 \times 2^{-2} + 1 \times 2^{-3} \\ &= 4 + 0 + 1 + 1/2 + 0 + 1/8 = 5 + 0.5 + 0.125 \\ (101.101)_2 &= (5.625)_{10} \end{aligned}$$

**Qn. 15**

Convert  $(71.24)_8 = (\quad)_{10}$ ?

விடை எபாய்து படிக்கவூக்.

**Ans**

$$\begin{aligned} 71.24 &= 7 \times 8^1 + 1 \times 8^0 + 2 \times 8^{-1} + 4 \times 8^{-2} \\ &= 56 + 1 + 2/8 + 4/8^2 \\ &= 57 + 0.25 + 0.0625 \\ (71.24)_8 &= (57.3125)_{10} \end{aligned}$$

**Qn. 16**

Convert  $(AB.88)_{16} = (\quad)_{10}$ ?

விடை எபாய்து படிக்கவூக்.

**Ans**

$$\begin{array}{ccccccc} & 10 & 11 & & & & \\ A & B & . & 8 & 8 & & \\ \downarrow & \downarrow & & \downarrow & \downarrow & & \\ 16^1 & 16^0 & 16^{-1} & 16^{-2} & & & \\ = & 160 + 11 + 0.5 + 0.03125 & & & & & \\ (AB.88)_{16} & = (171.53125)_{10} & & & & & \end{array}$$

**Qn. 17**

Convert  $(1011)_2 = (\quad)_8$ ?

விடை எபாய்து படிக்கவூக்.

**Ans**

Step I: First divide the number into groups of 3 bits starting from the right side and insert necessary zeroes in the left side.

0 0 1 | 0 1 1

Step II: Next write down the octal equivalent.

0 0 1	0 1 1
↓	↓
1	3

So the answer is

$(1011)_2 = (13)_8$

**Qn. 18**

Convert  $(110100)_2 = (\quad)_{16}$ ?

விடை எபாய்து படிக்கவூக்.

**Ans**

Step I: First divide the number into groups of 4 bits starting from the right side and insert necessary zeroes in the left side.

Step II: Next write down the hexadecimal equivalent.

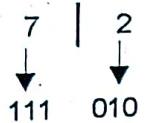

0 0 1 1		0 1 0 0
↓		↓
3		4

So the answer is

$(110100)_2 = (34)_{16}$

**Qn. 19** $(72)_8 = ( )_2$ ?

விடை போய்த் புரிபிக்குக.

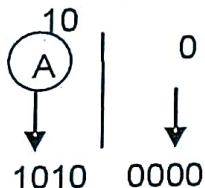

**Ans:** Write down the 3 bits equivalent of each digit.

So the answer is

$(72)_8 = (111010)_2$

**Qn. 20** $\text{Convert } (AO)_{16} = ( )_2 ?$ 

விடை போய்த் புரிபிக்குக.

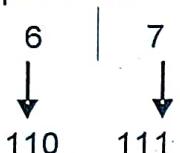

**Ans:** Write down the 4 bits equivalent of each digit

So the answer is

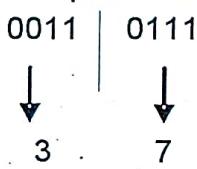

$(AO)_{16} = (1010\ 0000)_2$

**Qn. 21** $\text{Convert } (67)_8 = ( )_{16}$ 

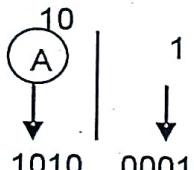

விடை போய்த் புரிபிக்குக.

**Ans:** Step I : First convert this number into binary equivalent for this do the following:

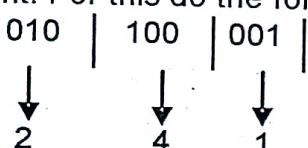

Step II : Next convert this number into hexadecimal equivalent for this do the following.

So the answer is  $(67)_8 = (37)_{16}$ **Qn. 22** $\text{Convert } (A1)_{16} = ( )_8 ?$ 

விடை போய்த் புரிபிக்குக.

**Ans:** Step I : First convert this number into binary equivalent. For this do the following

Step II : Next convert this number into octal equivalent. For this do the following.

So the answer is  $(A1)_{16} = (241)_8$
