Thomas Alva Edison was born on February 11, 1847 at Milan, Ohio. Although he could not continue his studies in his school, he was very inquisitive from his boyhood to learn by understanding. When he was only ten years old, he set up a laboratory in the basement of his father's work place. He loved to mix liquids and powders to observe the reactions.

At the age of 12, he began selling newspapers and candy in trains. As a very keen observer, he learnt some preliminary techniques of telegraphy from the station master, which led him later to work as a roving telegrapher. During his stint as a supervisor in a telegraph company, he created a stock printer. In subsequent years, he invented phonograph - the machine for recording and reproducing sound. Edison thus made man's voice immortal.
