c) Pathanamthitta

d) Kollam

Activity 6 - Water and Soil

Different features of soil are given below.

There is air in the soil.

There is biomass in the soil.

There are traces of water in the soil.

a) Prepare an observation note to prove that there are traces of water in soil.

Aim :

Materials : Soil from garden, Transparent plastic bottle.

Method of experiment :

Observation

Inferences

As part of their study trip to a soil testing lab, Ammu and friends saw a statement displayed on a board in front the lab.

We can only survive if the soil is protected from pollution and loss of fertility.

b) Prepare as poster to give awareness on the need for protecting soil.
